● ABOUT MYSELF

Results-oriented Full-Stack Developer with 3+ years of experience architecting dynamic and responsive web applications. Proficient in backend development using PHP and Java, with advanced expertise in the Laravel framework. On the frontend, I leverage HTML5, CSS3, and modern frameworks including Angular, Ionic Angular, React, and Vue.js to build seamless user interfaces. I am committed to writing clean, scalable code and solving complex problems, aiming to deliver high-impact solutions in agile, team-oriented environments.

● WORK EXPERIENCE

13/09/2023 – CURRENT – RAWALPINDI, PAKISTAN

WEB DEVELOPER BRANTUM TECNOLOGIES

- Engaged in full-stack development using PHP, JavaScript, React, and Angular.
- Designed and implemented user-friendly and responsive web applications.
- Managed database design, development, and optimization for efficient performance.
- Worked closely with design teams to ensure seamless and engaging user experiences.
- Utilized frameworks like Laravel and Ionic Angular to build scalable and dynamic applications.
- Participated in agile development processes, including sprint planning, daily stand-ups, and reviews.
- Ensured code quality and performance through testing, debugging, and optimization.
- Continuously enhanced skills and contributed to improving workflows and project delivery timelines

07/06/2022 – 08/06/2023 – ISLAMABAD, PAKISTAN

INTERNSHIP EWAXAL

- Learned and applied PHP coding to develop dynamic web applications. Gained hands-on experience in implementing CRUD operations (Create, Read, Update, Delete) to manage data efficiently.
- Designed and developed backend functionality to save data in the database using SQL and PHP.
- Created front-end interfaces using HTML, CSS, and JavaScript to display data dynamically retrieved from the database.
- Worked on full-stack development, ensuring seamless integration between the front-end and back-end.
- Debugged and tested code to ensure smooth functionality and optimized performance.
- Strengthened understanding of database management, query optimization, and secure data handling practices

● SKILLS

Technical Skills

- Strong proficiency in Laravel for developing scalable and secure web applications and APIs, utilizing features such as Eloquent ORM, Blade templating, migrations, and middleware to build robust backend solutions.
- Experienced in HTML, CSS, and JavaScript for crafting dynamic and responsive user interfaces.
- Familiar with integrating front-end frameworks such as React to enhance user experience and optimize performance.
- Expertise in building and consuming RESTful APIs, ensuring seamless integration between the front-end and back-end systems.
- Proficient in using Git for collaborative development and efficient code management, including branching, merging, and pull requests to ensure smooth teamwork and version tracking.

- Knowledgeable in database design and management with MySQL, including writing complex queries, optimization, and ensuring data integrity.
- Understanding of user interface design principles and experience in translating wireframes and requirements into responsive and visually appealing web pages.

Soft Skills

- Communication: Effective written and verbal communication, active listening.
- Problem-solving: Analytical thinking, creative problem-solving, decision-making.
- Collaboration: Teamwork, adaptability, conflict resolution.
- Time management: Prioritization, meeting deadlines, multitasking.

● **EDUCATION**

BSIET(Information Engineering Technology)

Foundation University School of Science and Technology Rawalpindi [2019 - 2023]

City: Rawalpindi

ICs in Computer Science

APSACS RAWAT [2017 - 2019]

City: Rawat

Matric

APSACS Rawat [2015 - 2017]

City: Rawat

● **PROJECTS**

About Dimunet - Music Streaming Platform Project URL: <https://stream.yomie.be>

Dimunet is a comprehensive music streaming app where paid users can manage, schedule, and listen to thousands of songs. The app allows users to play songs locally on the device and on special hardware that can be controlled from anywhere. Features include playlist management, offline playback, remote hardware control, audio equalizer, crossfade support, and social sharing capabilities.

Technologies Used

- Ionic Framework
- Angular
- TypeScript
- Node.js
- PHP
- MySQL
- RESTful API
- Firebase
- Java
- Hybrid App Development
- Native App Development
- HTML5
- CSS3
- Google Analytics

CoSignage Player - Digital Signage CMS Project URL: <https://player.cosignage.com>

Write here the descripCoSignage Player is a powerful narrowcasting web application linked to a backend CMS where users can manage playlists. Playlists consist of multiple media files including videos, images, website links, weather slides, news feeds, RSS feeds, and music playback. Users can manage time, duration, weekdays, and other settings for each media file. The platform supports real-time synchronization with mobile apps.

Technologies Used

- Laravel
- Node.js
- PHP
- MySQL
- RESTful API
- AJAX
- jQuery
- Bootstrap
- HTML5
- CSS3
- Apache HTTP Server
- WebSockets
- Redis
- Git
- Project Analysis
- UX/UI Design
- Database Design
- API Integration

SnabbCab – Cab Management System (Your Actual Project)

Project URL: <https://new.snabbcab.com/>

Description:

SnabbCab is a web-based cab/dispatch management system designed for administrators and dispatchers to manage ride operations. The platform provides login access for Dispatchers and Super Admins to oversee drivers, trips, customers, and real-time ride assignments. The system enables operational management including ride allocation, driver tracking, fare management, and reporting.

Technologies to be used (for your responsive frontend work):

- Laravel (backend framework + Blade templating)
- Bootstrap 5 (responsive grid, components, utilities)
- CSS3 (custom media queries for breakpoints)
- HTML5 (semantic structure)
- jQuery / AJAX (async form submissions)
- MySQL (database)
- Git (version control)
- Responsive Design principles (mobile-first approach)
